Volume 71 1976

Table of Contents

No. 1 pp. 1–316 issued on December 1, 1976
No. 2 pp. 317–624 issued on December 15, 1976

1 Purification and Identification of a Human-Serum DNA-Binding Protein Associated with Malignant Diseases
R. G. Parsons and J. A. Hoch

9 Isolation and Characterization of (Poly(glycosyl)ceramides (Megaloglycolipids) with A, H and I Blood-Group Activities
J. Koscielak, H. Miller-Podraza, R. Krauze, and A. Piasek

19 DNA Blockade by Rifampicin-Inactivated *Escherichia coli* RNA Polymerase, and Its Amelioration by a Specific Mutation
R. S. Hayward

25 Separation of Malate Dehydrogenase Isoenzymes by Affinity Chromatography on 5′-AMP-Sepharose
R.-A. Walk and B. Hock

33 Evidence for the Nucleotide Sequence of 5-S rRNA from the Flowering Plant *Secale cereale* (Rye)
P. I. Payne and T. A. Dyer

39 Deoxyribonucleotide Pools in Mouse-Fibroblast Cell Lines with Altered Ribonucleotide Reductase
M. Meuth, E. Aufreiter, and P. Reichard

45 Ca^{2+}, K^{+}-Regulated Intramolecular Crosslinking of S-100 Protein *via* Disulfide Bond Formation
P. Calissano, D. Mercanti, and A. Levi

53 A Spin-Label Study of the Chromaffin Granule Membrane
D. Marsh, G. K. Radda, and G. A. Ritchie

63 Five-Coordinate Iron-Porphyrin as a Model for the Active Site of Hemoproteins. Characterization and Coordinating Properties
M. Momenteau, M. Rougée, and B. Loock

77 Transcription *in Vitro* of Φ29 DNA and *Eco*RI Fragments by *Bacillus subtilis* RNA Polymerase
M. R. Inciarte, E. Viñuela, and M. Salas

85 Rat b/b Anemia: Translation of Normal and Anemic Globin mRNA in Wheat-Germ Cell-Free System
R. Crkvenjakov, S. Čušić, I. Ivanović, and V. Glišin

93 The Effect of Endogenous Phosphate on the H^{+}/Mn^{2+} Ratio and the State of Mn^{2+} in the Mitochondrial Matrix
T. Pozzan, M. Bragadin, and G. F. Azzone

101 A New Plant-Type Ferredoxin from Halobacteria
L. Kerscher, D. Oesterhelt, R. Cammack, and D. O. Hall

109 Sequence Studies on D-Serine Dehydratase of *Escherichia coli*. Primary Structure of the Tryptic Phosphopyridoxyl Peptide and of the N-Terminus
E. Schiltz and K. D. Schnackerz

117 Poly(A)-Containing RNA in *Tetrahymena pyriformis*
C. Rodriguez-Pousada and D. H. Hayes

125 The Virtual Absence of Antigenic Cross-Reactivity between Functionally Distinct Trout Hemoglobins
A. L. Tan-Wilson, M. Reichlin, M. Brunori, and R. W. Noble

131 Quantitative Determination of *N*-Acetylglucosamine Residues at the Non-reducing Ends of Peptidoglycan Chains by Enzymic Attachment of [^{14}C]-D-Galactose
M. Schindler, D. Mirelman, and U. Schwarz

135 Effect of Thyroid Hormones on Microsomal Fatty Acid Chain Elongation Synthesis in Rat Liver
C. Landriscina, G. V. Gnoni, and E. Quagliariello

145 Human Coagulation Factor IX. Isolation and Characterization
H. Suomela

155 Replenishment and Depletion of Citric Acid Cycle Intermediates in Skeletal Muscle. Indication of Pyruvate Carboxylation
O. Spydevold, E. J. Davis, and J. Bremer

167 Further Studies on the Binding of Maltose to the Maltose-Binding Protein of *Escherichia coli*
M. Schwartz, O. Kellermann, S. Szmelcman, and G. L. Hazelbauer

171 Free 3′-OH Group of the Terminal Adenosine of the tRNA Molecule Is Essential for the Synthesis *in vitro* of Guanosine Tetraphosphate and Pentaphosphate in a Ribosomal System from *Escherichia coli*
M. Sprinzl and D. Richter

177 Microtubular Proteins in Pigeon Erythrocyte Membranes
H. P. Zenner and T. Pfeuffer

185 Degradation of Abnormal Proteins in *Escherichia coli*. Differential Proteolysis *in vitro* of *E. coli* Alkaline Phosphatase Cyanogen-Bromide-Cleavage Products
J. T. Kemshead and A. R. Hipkiss

193 Studies on the Synthesis of Casein Messenger RNA during Pregnancy in the Rabbit
R. C. Shuster, L.-M. Houdebine, and P. Gaye

201 Isolation and Properties of an Inhibitor of *Escherichia coli* RNA Polymerase
A. Crimaldi and G. Ihler

211 A Complex Control Circuit. Regulation of Immunity in Temperate Bacteriophages
R. Thomas, A.-M. Gathoye, and L. Lambert

229 Studies on the Influence of Fatty Acids on Pyruvate Dehydrogenase Interconversion in Rat-Liver Mitochondria
E. I. Wałajtys-Rode

239 Small-Angle X-Ray Studies of the Fab and Fc Fragments from the Human Immunoglobulin Molecule Kol
I. Pilz, E. Schwarz, and W. Palm

249 Esterolytic Activities of Rat Intestinal Mucosa. 1. Characterization, Cellular Distribution and Subcellular Localization of a Glycerol-Ester Hydrolase
R. Négrel, G. Serrero, V. Fernandez-Lopez, and G. Ailhaud

259 Esterolytic Activities of Rat Intestinal Mucosa. 2. Purification and Properties of a Glycerol-Ester Hydrolase
V. Fernandez-Lopez, G. Serrero, R. Négrel, and G. Ailhaud

271 A New Concept of the Function of Elongation Factor 1 in Peptide Chain Elongation
H. Grasmuk, R. D. Nolan, and J. Drews

281 5′-Capping Structures of *Artemia salina* mRNA and the Translational Inhibition by Cap Analogs
Y. Groner, H. Grosfeld, and U. Z. Littauer

295 Acetyl-Coenzyme-A Carboxylase of *Candida lipolytica*. 1. Purification and Properties of the Enzyme
M. Mishina, T. Kamiryo, A. Tanaka, S. Fukui, and S. Numa

301 Acetyl-Coenzyme-A Carboxylase of *Candida lipolytica*. 2. Regulation of Cellular Content and Synthesis of the Enzyme
M. Mishina, T. Kamiryo, A. Tanaka, S. Fukui, and S. Numa

309 Isolation, Subunit Structure and Properties of the ATP-Dependent Deoxyribonuclease of *Bacillus subtilis*. State of the Protein in a Mutant Devoid of Activity
J. Doly and C. Anagnostopoulos

317 Chorismate Mutase/Prephenate Dehydratase from *Escherichia coli* K12. 1. The Effect of NaCl and Its Use in a New Purification Involving Affinity Chromatography on Sepharosyl-phenylalanine
M.-J. H. Gething, B. E. Davidson, and T. A. A. Dopheide

327 Chorismate Mutase/Prephenate Dehydratase from *Escherichia coli* K12. 2. Evidence for Identical Subunits Catalysing the Two Activities
M.-J. H. Gething and B. E. Davidson

337 A pH-Dependent Interaction between Histones H2A and H2B Involving Secondary and Tertiary Folding
T. Moss, P. D. Cary, B. D. Abercrombie, C. Crane-Robinson, and E. M. Bradbury

351 Nucleolar DNA-Dependent RNA Polymerase from Rat Liver. 1. Purification and Subunit Structure
T. Matsui, T. Onishi, and M. Muramatsu

361 Nucleolar DNA-Dependent RNA Polymerase from Rat Liver. 2. Two Forms and Their Physiological Significance
T. Matsui, T. Onishi, and M. Muramatsu

369 Excretion of Taurocholate from Isolated Hepatocytes
L. R. Schwarz, M. Schwenk, E. Pfaff, and H. Greim

375 Stopped-Flow Spectrophotometric Characterization of Enzymic Reaction Intermediates in the Anaerobic Reduction of Pig-Plasma Benzylamine Oxidase by Amine Substrates
B. Olsson, J. Olsson, and G. Pettersson

383 Proton Equilibria in the Binding of Zn^{2+} and of Methylmercuric Iodide to Papain
L. A. Æ. Sluyterman and J. Wijdenes

393 Catalase Biosynthesis in Yeast: Formation of Catalase A and Catalase T during Oxygen Adaptation of *Saccharomyces cerevisiae*
P. Zimniak, E. Hartter, W. Woloszczuk, and H. Ruis

399 Production and Properties of Vitamin-D-Induced mRNA for Chick Calcium-Binding Protein
R. Spencer, M. Charman, J. S. Emtage, and D. E. M. Lawson

411 Electron Spin Resonance Investigations of Mitochondrial Electron Transport in *Neurospora crassa*. Characterization of Paramagnetic Intermediates in a Standard Strain
J. T. Warden and D. L. Edwards

419 Histone-Hydrocarbon Interaction. Partition of Histones in Aqueous Two-Phase Systems Containing Poly(ethylene glycol)-Bound Hydrocarbons
C.-G. Axelsson and V. P. Shanbhag

425 Stopped-Flow Studies of Changes in Fluorescence of 8-Anilino-1-naphthalene Sulfonic Acid Caused by Magnesium and Salt Binding to Yeast Enolase
J. M. Brewer

437 Thermodynamic Studies on the Specificity of L-Isoleucine·tRNA Ligase of *Escherichia coli* MRE 600. Calorimetric Investigations on Binding of Amino Acids and Isoleucinol to the Enzyme
H.-J. Hinz, K. Weber, J. Flossdorf, and M.-R. Kula

443 Interaction of DNA with DNA-Binding Proteins. The Characterization of Protein HD from *Escherichia coli* and Its Nucleic Acid Complexes
V. Berthold and K. Geider

451 Isolation and Characterization of Hydrophobic Proteins (H Proteins) in the Membrane Fraction of *Bacillus subtilis*. Involvement in Membrane Biosynthesis and the Formation of Biochemically Active Membrane Vesicles by Combining H Proteins with Lipid
I. Kusaka, K. Hayakawa, K. Kanai, and S. Fukui

459 Enzyme-Linked Sandwich Immunoassay of Macromolecular Antigens Using the Rabbit-Antibody-Coupled Glass Rod as a Solid Phase
Y. Hamaguchi, K. Kato, H. Fukui, I. Shirakawa, S. Okawa, E. Ishikawa, K. Kobayashi, and N. Katunuma

469 An Assessment of Some of the Methods Available for the Determination of Molecular Weights of Proteins as Applied to Aspartate Aminotransferase from Pig Heart
B. E. C. Banks, S. Doonan, M. Flogel, P. B. Porter, C. A. Vernon, J. M. Walker, T. H. Crouch, J. F. Halsey, E. Chiancone, and P. Fasella

475 Kinetics of the Interaction between Aspartic Aminotransferase and Anions
I. Giannini, V. Baroncelli, G. Boccalon, and P. Fasella

483 Characterization and Site of Action of a Soluble Protein that Stimulates Peptide-Bond Synthesis
B. R. Glick and M. C. Ganozá

493 Levansucrase of *Bacillus subtilis* Characterization of a Stabilized Fructosyl-Enzyme Complex and Identification of an Aspartyl Residue as the Binding Site of the Fructosyl Group
R. Chambert and G. Gonzy-Treboul

509 Symmetry and Asymmetry of the Pyruvate Dehydrogenase Complexes from *Azotobacter vinelandii* and *Escherichia coli* as Reflected by Fluorescence and Spin-Label Studies
H. J. Grande, H. J. van Telgen, and C. Veeger

519 Difficulties in Determining Accurate Molecular Motion Parameters from Proton Relaxation Enhancement Measurements as Illustrated by the Immunoglobulin G · Gd(III) System
D. R. Burton, S. Forsén, G. Karlström, R. A. Dwek, A. C. McLaughlin, and S. Wain-Hobson

529 An Analysis on the Slope of Scatchard Plots
Y. I. Henis and A. Levitzki

533 The Dissociation of Flavin Coenzymes from Trypsin-Solubilized NADPH/Cytochrome *c* (*P*-450) Reductase of Pig-Liver Microsomes
G. E. Trout

539 Studies on the Adenine Nucleotide Translocase from Rat Liver Mitochondria. Isolation, Partial Characterization and Immunochemical Properties of Carboxyatractylate-Binding Protein
D. Bojanovski, E. Schlimme, C. S. Wang, and P. Alaupovic

549 Metabolism of γ-Glutamyl Amino Acids and Peptides in Mouse Liver and Kidney *in vivo*
M. Orlowski and S. Wilk

557 Conformational Analysis of a DNA Triplet in Aqueous Solution. Thymidylyl-(3′-5′)-thymidylyl-(3′-5′)-2′-deoxyadenosine, d(T-T-A), Studied by ^{1}H Nuclear Magnetic Resonance at 360 MHz
C. Altona, J. H. van Boom, and C. A. G. Haasnoot

563 Use of Methyl Iodide for Probing the Polarity of the Immediate Environment of –SH Groups in Thiolenzymes. Reaction of Methyl Iodide with Thiolsubtilisin
P. Halász and L. Polgár

571 Effect of the Immediate Environment on the Reactivity of the Essential –SH Group of Papain
P. Halász and L. Polgár

577 Terminal Riboadenylate Transferase from *Escherichia coli*. Characterization and Application
H. Sano and G. Feix

585 Purification of the Membrane-Bound DD-Carboxypeptidase of the Unstable Spheroplast L-Form of *Proteus mirabilis* by Affinity Chromatography. Non-competitive Inhibition of the Enzyme by Penicillins and Low Stability of the Enzyme-Inhibitor Complex
H. H. Martin, W. Schilf, and C. Maskos

595 Proton-Nuclear-Magnetic-Resonance Study of the Conformation of Neurotoxin II from Middle-Asian Cobra (*Naja naja oxiana*) Venom
A. S. Arseniev, T. A. Balashova, Y. N. Utkin, V. I. Tsetlin, V. F. Bystrov, V. T. Ivanov, and Y. A. Ovchinnikov

607 Lipid Requirement of Membrane-Bound 3-Oxosteroid Δ^4-Δ^5-Isomerase. Studies on Beef Adrenocortical Microsomes
P. Geynet, C. de Paillerets, and A. Alfsen

613 Magnetic Studies on the Ferri-haem Undecapeptide of Cytochrome *c*
A. M. T. Jehanli, D. A. Stotter, and M. T. Wilson

617 An Endonuclease from Mouse Cells Specific for Single-Stranded DNA
B. Otto and R. Knippers

623 Corrections
